Twitter's Clumsy Pivot to X.com Is a Gift to Phishers

April 10, 2024 [24 Comments](#)

On April 9, Twitter/X began automatically modifying links that mention "twitter.com" to read "x.com" instead. But over the past 48 hours, dozens of new domain names have been registered that demonstrate how this change could be used to craft convincing phishing links – such as [fedetwitter\[.\]com](#), which until very recently rendered as [fedex.com](#) in tweets.

Are you serious, X Corp?

Ahoy there, welcome to goodrtwitter.com!
I assure you, there's nothing fishy going on here, so feel free to read on.

The KrebsOnSecurity logo is visible at the bottom right of the page.

STOCKER LES INFORMATIONS

NOTION

The screenshot shows a digital workspace for managing information. The background features a red and black circuit board pattern. At the top, there's a navigation bar with icons for back, forward, search, and sharing, along with a title 'Veille Informatique' and a timestamp 'Dernière modification : à l'instant'. On the left, a sidebar includes a 'Notion de nana:' section with links to 'Rechercher', 'Boîte de réception', 'Paramètres et membres', and 'Nouvelle page'. Below this are sections for 'Favoris' and 'Pages privées', with 'Veille Informatique' being the active page. The main content area is titled 'Veille Informatique' and contains a grid of items categorized into 'blogs' and 'Article'. Each item has a title, a link, and a status indicator ('à lire' or 'lu'). A 'Nouveau' button is visible at the top right of the grid.
